

LAB MANUAL

**CSA1522-CLOUD COMPUTING AND BIG DATA
ANALYTICS**

**Student name: Kanmani L
Register number: 192511414**

EXPERIMENT 1:

CREATE A SIMPLE CLOUD SOFTWARE APPLICATION FOR CAR BOOKING RESERVATION SYSTEM USING ANY CLOUD SERVICE PROVIDER TO DEMONSTRATE SAAS.

AIM:

To Create a simple cloud software application for Car Booking Reservation System using any Cloud Service Provider to demonstrate SaaS.

PROCEDURE:

STEP1:

Log into zoho.com

STEP 2: Create new application from scratch

The image shows the "Create from scratch" form in Zoho Creator. At the top, there is a logo consisting of two blue circles and a plus sign. Below the logo is the text "Create from scratch". The form has a light gray background. It contains a label "Application Name" with a red asterisk, followed by a text input field containing "Flight Reservation System". Below the input field is a checkbox labeled "Enable Environment" with a link "Learn More" in blue. At the bottom of the form is a large blue button labeled "Create Application".

STEP 3: Create new application and create form from scratch

STEP 12: Create and display the Dashboard with important information and charts from the collected data.

EXPERIMENT 2:

CREATE A SIMPLE CLOUD SOFTWARE APPLICATION FOR PROPERTY BUYING & RENTAL PROCESS IN CHENNAI CITY USING ANY CLOUD SERVICE PROVIDER TO DEMONSTRATE SAAS.

Aim:

To create a simple cloud software application for Property Buying and Rental Process in Chennai City using any Cloud Service Provider to demonstrate SaaS.

PROCEDURE:

STEP 1: Log into **zoho.com**.

STEP 2: Create a new application from scratch in Zoho Creator.

The image shows the "Create from scratch" form in Zoho Creator. At the top, there is a header with the Zoho logo and the text "Create from scratch". Below this, there is a form with a label "Application Name" followed by a red asterisk. The text "Chennai Property Hub" is entered in the input field. Below the input field, there is a checkbox labeled "Enable Environment" followed by a blue link "Learn More". At the bottom of the form, there is a large blue button labeled "Create Application".

STEP 3: Create a new application and create forms from scratch.

STEP 4: Create Property Form.

STEP 5: Create Customers Form.

The screenshot shows the 'Chennal Property Hub' interface for creating a 'Customers' form. The top bar includes a search icon, a dropdown menu, a plus icon, and a 'Done' button. The main area is divided into three sections: 'Basic Fields', 'Field Properties', and a central list of fields.

Basic Fields: A grid of icons for Name, Email, Address, Phone, Single Line, Multi Line, Number, and Date.

Field Properties: A panel on the right showing the configuration for the selected field, 'Customer ID'. It includes fields for 'Field name' (Customer ID), 'Field link name' (customer_id), 'Validation' (Start index: 1), and 'Appearance' (Field type: Text).

Central Fields List: A list of fields to be added to the form, including Customer ID, Customer Name, Gender, Mobile Number, Email, Address, Preferred Property Type, and Status.

STEP 6: Create Property Search Form.

The screenshot shows the 'Chennal Property Hub' interface for creating a 'Property Searches' form. The top bar includes a search icon, a dropdown menu, a plus icon, and a 'Done' button. The main area is divided into three sections: 'Basic Fields', 'Field Properties', and a central list of fields.

Basic Fields: A grid of icons for Name, Email, Address, Phone, Single Line, Multi Line, Number, and Date.

Field Properties: A panel on the right showing the configuration for the selected field, 'Buy or Rent'. It includes fields for 'Field name' (Buy or Rent), 'Field link name' (buy_or_rent), and 'Choices' (Buy, Rent).

Central Fields List: A list of fields to be added to the form, including Buy or Rent, Property Category, Preferred Location, Budget Range, Bedrooms, Furnishing, and Customer.

STEP 7: Create Rental Agreement Form.

The screenshot shows the 'Chennal Property Hub' interface for creating a 'Rental Agreements' form. The top bar includes a search icon, a dropdown menu, a plus icon, and a 'Done' button. The main area is divided into three sections: 'Basic Fields', 'Field Properties', and a central list of fields.

Basic Fields: A grid of icons for Name, Email, Address, Phone, Single Line, Multi Line, Number, and Date.

Field Properties: A panel on the right showing the configuration for the selected field, 'Customer'. It includes fields for 'Field name' (Customer), 'Field link name' (customer), and 'Display type' (Multi Select).

Central Fields List: A list of fields to be added to the form, including Customer, Property, Agreement Start Date, Agreement End Date, Monthly Rent, Security Deposit, and Agreement Status.

STEP 10: Add sample data to all the created forms.

The screenshot shows the 'Chennai Property Hub' interface with the 'Property Bookings' form. The form includes fields for Customer (1 x), Property (4 x), Buy or Rent (Rent selected), Booking Date (28-Jul-2026), Advance Amount (20000), Total Property Value (100000), and Booking Status (Confirmed). There are 'Submit' and 'Reset' buttons at the bottom.

STEP 11: Create reports to display the data entered in the respective forms.

The screenshot shows the 'Chennai Property Hub' interface with the 'Property Bookings Report' table. The table displays 6 rows of booking data with columns for Customer, Property, Buy or Rent, Booking Date, Advance Amount, Total Property Value, and Booking Status.

Customer	Property	Buy or Rent	Booking Date	Advance Amount	Total Property Value	Booking Status
1	4	Rent	28-Jul-2026	\$ 20,000.00	\$ 100,000.00	Confirmed
2	1	Buy	01-Aug-2026	\$ 125,000.00	\$ 1,750,000.00	Cancelled
3	2					
	3					
	4					
	5					
1	1	Buy	30-Jul-2026	\$ 25,000.00	\$ 800,000.00	Cancelled

STEP 8: Create Payment form

The screenshot shows the 'Car Booking Reservation System Payments' form creation interface. The 'Basic Fields' panel on the left contains icons for Name, Email, Address, Phone, Single Line, Multi Line, Number, and Date. The main form area has a search bar with 'Booking' and a trash icon. Below it are fields for Payment Date, Payment Method, Amount, Transaction ID, and Payment Status. The 'Field Properties' panel on the right shows the field name 'Booking', field link name 'booking', and display type 'Drop Down'. The 'Display Fields' section shows 'Car Booking Reservation System → Bookings' and a dropdown for 'Booking ID'.

STEP 9: Create Feedback Form

The screenshot shows the 'Car Booking Reservation System Feedbacks' form creation interface. The 'Basic Fields' panel on the left contains icons for Name, Email, Address, Phone, Single Line, Multi Line, Number, and Date. The main form area has a search bar with 'Customer' and a trash icon. Below it are fields for Car, Rating, and Comments. The 'Field Properties' panel on the right shows the field name 'Customer', field link name 'customer', and display type 'Drop Down'. The 'Display Fields' section shows 'Car Booking Reservation System → Customers' and a dropdown for 'Customer ID'.

STEP 10: Add sample data to all the created forms.

The screenshot shows the 'Car Booking Reservation System' dashboard. The left sidebar contains a menu with 'Dashboard', 'Feedbacks', 'Feedbacks Report', 'Cars', 'Payments', 'Customers', 'Bookings', and 'Search Cabs'. The 'Feedbacks' form is displayed with sample data: Customer (6), Car (3), Rating (5), and Comments (GOOD PERFORMANCE). The form has 'Submit' and 'Reset' buttons. The top bar shows 'Car Booking Reservation System' and 'Trial expires in 14 days'.

STEP 11: Create reports to display the data entered in the respective forms.

EXPERIMENT 5:

CREATE A SIMPLE CLOUD SOFTWARE APPLICATION FOR MARK SHEET PROCESSING SYSTEM USING ANY CLOUD SERVICE PROVIDER TO DEMONSTRATE SAAS.

AIM:

To create a simple cloud software application for Mark Sheet Processing System using any Cloud Service Provider to demonstrate SaaS.

PROCEDURE:

STEP 1: Log into **zoho.com**.

STEP 2: Create a new application from scratch in Zoho Creator.

A screenshot of the "Create from scratch" form in Zoho Creator. At the top, there are four icons: a blue circle, an empty square, a square with a plus sign, and a plus sign. Below these icons is the text "Create from scratch". The form contains a label "Application Name" with a red asterisk, followed by a text input field containing "SIMATS Marksheet Processing System". Below the input field is a checkbox labeled "Enable Environment" with a link "Learn More" in blue. At the bottom of the form is a large blue button labeled "Create Application".

STEP 3: Create a new application and create forms from scratch.

STEP 4: Create Students Form.

STEP 5: Create Subject Form.

The screenshot shows the 'Subjects' form creation interface. On the left, a 'Basic Fields' panel contains icons for Name, Email, Address, Phone, Single Line, Multi Line, Number, and Date. The main form area lists fields: Subject ID (selected), Subject Code, Subject Name, Semester, Credits (123), and Faculty Name. A right-hand 'Field Properties' panel shows details for 'Subject ID': Field name is 'Subject ID', Field link name is 'subject_id', Validation is 'Start index' with a value of '1', and Field type is 'Auto Number'. The bottom status bar indicates a 14-day trial and provides links for upgrade, help, and getting started faster.

STEP 6: Create Marks Form.

The screenshot shows the 'Marks' form creation interface. The 'Basic Fields' panel is identical to the previous step. The main form area lists fields: Student (selected), Subject, Internal Marks (123), External Marks (123), Total Marks (123), and Grade. The 'Field Properties' panel for 'Student' shows: Field name is 'Student', Field link name is 'student', and Display Fields include 'SIMATS Mark Sheet Processing System' and 'Students'. The bottom status bar is consistent with the previous steps.

STEP 7: Create Mark Sheet Form.

The screenshot shows the 'Mark Sheets' form creation interface. The 'Basic Fields' panel is identical. The main form area lists fields: Student (selected), Semester, Total Marks (123), Average (00), Percentage (00), Overall Grade, and Overall Performance (selected). The 'Field Properties' panel for 'Student' shows: Field name is 'Student', Field link name is 'student', and Display Fields include 'SIMATS Mark Sheet Processing System' and 'Students'. The bottom status bar is consistent with the previous steps.

STEP 8: Create Feedback Form.

The screenshot shows the 'Feedbacks' form creation interface. On the left, under 'Basic Fields', there are icons for Name, Email, Address, Phone, Single Line, Multi Line, Number, and Date. In the center, there are input fields for 'Student' (with a search icon), 'Rating', and 'Comments'. On the right, the 'Field Properties' panel shows 'Field name' as 'Student', 'Field link name' as 'student', and 'Display Fields' as 'SIMATS Mark Sheet Processing System -> Students'. The 'Display type' is set to 'Drop Down'. The bottom status bar indicates 'Trial expires in 14 days' and includes links for 'Upgrade', 'Get started faster!', and 'Help'.

STEP 9: Create Rank List Form.

The screenshot shows the 'Rank Lists' form creation interface. On the left, under 'Basic Fields', there are icons for Name, Email, Address, Phone, Single Line, Multi Line, Number, and Date. In the center, there are input fields for 'Student' (with a search icon), 'Percentage', 'Rank', and 'Academic Year'. On the right, the 'Field Properties' panel shows 'Field name' as 'Student', 'Field link name' as 'student', and 'Display Fields' as 'SIMATS Mark Sheet Processing System -> Students'. The 'Display type' is set to 'Drop Down'. The bottom status bar indicates 'Trial expires in 14 days' and includes links for 'Upgrade', 'Get started faster!', and 'Help'.

STEP 10: Add sample data to all the created forms

The screenshot shows the 'Subjects' form in the SIMATS Mark Sheet Processing System. The left sidebar contains a navigation menu with options: Dashboard, Marks, Mark Sheets, Feedbacks, Subjects (selected), Subjects Report, Rank Lists, and Students. The main form area has input fields for 'Subject Code' (CSA15), 'Subject Name' (cloud computing), 'Semester' (2), 'Credits' (6), and 'Faculty Name' (Dr.Rajaram). At the bottom, there are 'Submit' and 'Reset' buttons. The top status bar shows 'SIMATS Mark Sheet Processing System' and a user profile 'Kanmani Log...'.

STEP 11: Create reports to display the data entered in the respective forms.

EXPERIMENT 7:

CREATE A SIMPLE CLOUD SOFTWARE APPLICATION FOR STUDENTS ATTENDANCE SYSTEM USING ANY CLOUD SERVICE PROVIDER TO DEMONSTRATE SAAS.

AIM:

To create a simple cloud software application for Students Attendance System using any Cloud Service Provider to demonstrate SaaS.

PROCEDURE:

STEP 1: Log into **zoho.com**.

STEP 2: Create a new application from scratch in Zoho Creator.

A screenshot of the "Create from scratch" form in Zoho Creator. At the top, there is a logo consisting of four colored squares (blue, orange, green, and red) arranged in a 2x2 grid. Below the logo, the text "Create from scratch" is displayed. The form contains a label "Application Name" with a red asterisk, followed by a text input field containing "Students Attendance Management System". Below the input field, there is a checkbox labeled "Enable Environment" with a link "Learn More" next to it. At the bottom of the form is a large blue button labeled "Create Application".

STEP 3: Create a new application and create forms from scratch.

STEP 4: Create Student Form.
